

EM Fact Sheet

Ogden Air Logistics Center
Environmental Management Directorate
7274 Wardleigh Road
Hill AFB, Utah 84056-5137

NEPA

Purpose: This fact sheet provides information on the NEPA Program for Hill AFB. The Air Force implements NEPA through EIAP (Environmental Impact Analysis Process) and the AF Form 813 "Request for Environmental Impact Analysis." NEPA is governed under the authority of the *National Environmental Policy Act of 1969*, Public Law 91-190, 42 U.S.C. §§4321-4347 and the *Council on Environmental Quality (CEQ) Regulations for Implementing the Procedural Provisions of NEPA* (40 CFR Parts 1500 – 1508).

Mission: To provide an "insurance policy" for actions and activities that ensures appropriate consideration of the potential environmental impacts of any proposed action or activity as part of our planning and decision making. Ensuring environmental compliance is an integral part of the future missions of Hill AFB

Meet the Team:

Kay Winn 777-0383 NEPA Program Manager

Program Highlights

Data Management: The NEPA program is working jointly with Natural and Cultural Resources Program to more effectively manage the more than 1 million acres of land by utilizing a Geographical Information System (GIS) and a global positioning system (GPS). These two systems will enable us to have an overall picture of the potential environmental impacts of proposed actions by overlaying the proposal on known resources and existing features. We are currently working with several other programs to integrate NEPA data to provide a better overall picture of potential environmental impacts on the base as well as the range. The EATS program was developed to monitor air process changes and includes an automation of the 813 process.

The EIAP program processed in excess of 716 AF Form 813's or AF Form 332's. These were reviewed for all applicable environmental impacts and either CATEX'd or an environmental assessment (EA) was completed. 15 EA's and 45 environmental baseline surveys/waivers were completed for FY 99.

AF 813 PROCESS
